

IN THE CLAIMS:

Please add new Claims 3 and 4 as shown below and amend Claims 1 and 2

as follows. The claims, as pending in the subject application, read as follows:

---

1. (Currently Amended) A display apparatus, comprising:

a remote controller;

a display means unit;

a connecting means for connecting unit which forms a connection between  
the display apparatus and an external apparatus; and

a control means for controlling said unit which controls the display means  
unit so as to operate as a monitor of the external apparatus when if a first operating mode is  
chosen selected by the remote controller, and controlling said controls the display means  
unit so as to operate as a monitor of the external display apparatus when if a second  
operating mode is chosen selected by the remote controller.

2. (Currently Amended) The display apparatus according to Claim 1,  
wherein, when if the first operating mode is chosen selected, the connecting means unit  
disconnects the connection between the display apparatus and the external apparatus.

3. (New) A method for a display apparatus, the display apparatus  
comprising a remote controller and a display unit, the method comprising the steps of:

a connecting step of forming a connection between the display apparatus  
and an external apparatus; and

a first controlling step of controlling the display unit to operate as a monitor of the external apparatus if a first operating mode is selected by the remote controller; and

a second controlling step of controlling the display unit to operate as a monitor of the display apparatus if a second operating mode is selected by the remote controller.

4. (New) The method according to Claim 3, further comprising a disconnecting step of disconnecting the connection between the display apparatus and the external apparatus if the first operating mode is selected.
